

Acer p. Sango Kaku

**BOUNTIFUL
FARMS**

Coral Bark Japanese Maple is one of those rare trees that adds beauty to the landscape year round. Deeply cut pale green leaves edged in red adorn the tree in spring and summer, followed by bright yellow fall color. Winter brings it's own fabulous color show when the red-coral bark intensifies in hue, creating a winter showpiece. This beauty thrives in dappled shade in warmer climates and full sun in more northern regions.
