FARMS

TAXUS BACCATA FASTIGIATA

Columnar Irish Yew are the ultimate in resilience and versatility. They make a fabulous hedge that will slowly grow up to 25 feet tall. They also look striking as a pair in an entryway or all by themselves as a tall, vertical exclamation in the landscape. Left alone, Irish Yew will grow into an attractive shape but also tolerate shearing well. They thrive in sun and shade, and once established, need very little water.
