

BOUNTIFUL FARMS

Sekkan Sugi Japanese Cedar is often referred to as 'Golden Curls' because of the bright yellow, weeping curls at the end of each of its branches. Upright and conical in form. Pendulous branches display soft foliage that emerges yellow in spring and darkens over time to a soft green. Sekkan Sugi performs well in full sun or part shade, but for brightest golden color, full sun is preferred. Over time, this graceful tree grows into a magnificent focal point.
